Rob,

The figures themselves show the entire Ladd Landing permit boundary, the actual physical footprint of the development, and the precise physical locations of the resources all overlain on one map, so it is pretty easy to spot the resources which appear to still be in the revised footprint.

Thank you Jamey. Do you also have information that identifies what features will not be avoided in the project? Please do send President Standifer an electronic and a hard copy to be sure he has it. Thank you for all your work

Rob, Heather

I think the best figures I have seen showing the revised Ladd Landing footprint in relation to the cultural resources identified by Stephen R. Braund & Associates are found in the 10 July 2009 report titled **2009 Results of Surface Depression Testing within the Revised Proposed Ladd Landing Facilities Footprint , *Ch'u'itnu* Archaeological District (TYO-00132), Ladd Landing, Alaska**. This report was sent to President Standifer both in hard copy and electronically, but I am more than happy to send it again, either electronically or in hard copy. Due to the sensitive nature of the report I would feel most comfortable sending it directly to President Standifer if that is ok. Alternatively, if he could send my an email asking my to send him and reports with a cc: to both of you, that is fine as well. Thanks.

Subject: Fwd: question for Jamey Stoddard re District impacts and relocation of project

---

Hi Jamey:

On June 6th, 2011, you wrote a letter to the Advisor Council on Historic Preservation. On page 2, 2nd paragraph from the bottom you stated: "Since initial discovery..... the project proponents have redesigned the layout of Ladd.....to avoid many cultural features as possible and minimize the level of direct impacts to the district. While many features contributing to the.....District will now be avoided, there are several features that will be directly impacted by the development, and the district as a whole will be

indirectly impacted through unavoidable alterations in the setting and feeling of the area"

On May 11th, 2012- NVT will have a government to government meeting with the Army Corps. Additional information will be very helpful for the meeting.

I am writing to ask you for relevant maps and GPS coordinates to describe how the layout of Ladd has changed and any background information that resulted in this conclusion. It would be great to know which features will be avoided and which ones won't be and to know of the changes that have been proposed. I trust you can elaborate on this.

I greatly appreciate your time. Heather Kendall Miller with Native American Rights Fund has directed me to be in contact with you to solicit the above information.

Regards.

Rob Rosenfeld
